MANAGING ORGANISATION

# JOHTO: Quick and Adept way to do things

# Problem Statement

**"The only difference between a mob and a trained army is organization."**

**Due to the lack of a single platform for task management, team communication, and progress tracking, organization frequently deal with disorganization ( files, data), delays, and miscommunication. Team members may find it difficult to share information and get notification of different events in an organization which could lead to loss of communication and lower efficiency. Also, when teams are distributed across various regions, location tracking is frequently a problem.**

**Example : Like in school Management, there is not proper communication system between teachers and students or teacher with higher officials that leads problem of cooperation and management. Report card and suggestion features can help the student for better growth in academics and curriculum.**

# How we solve this problem

We propose the development of a website with a variety of features designed to improve organizational management. Our website will include tools for group messaging, task management, location tracking, and reporting etc. Our platform will also include a suggestion area where team members can provide feedback and suggestions for improving overall workflow and productivity. In addition with platform follows hierarchy system with proper order and certain authentication where higher authority send messages and give an office order to their staff members so that easily communication help to grow their organization

Our goal is to provide a comprehensive solution that addresses the common challenges that organizations face and empowers them to work more efficiently, effectively, and collaboratively.

# Objectives/Features

- ◇ Location Tracker
- ◇ Report card
- ◇ suggestion /advice section
- ◇ Notification
- ◇ Attendance /Timetable/event details

# Conclusion

The potential result of implementing the proposed website could be significant for organizations .By providing the platform for managing all the tasks in an organized manner that help in overall growth of firm .Some of the specific results that could be achieved with the implementation of the website includes:

- 1.Improved
- 2.Proper
- 3.Enhanced
- 4.Increase productivity

task

communication  
management  
collaboration

# Future Scope

This website can be extend in many field Like in :

1. Medical Field : In this section Efficient patient management, scheduling dates , Financial management can be helpful to patient and achieve better outcomes.
2. Business Field : This website help to streamline their workflows, improve collaboration and communication and increase efficiency and profitability.
3. For NGO : The management system can help NGOs to achieve their goals more effectively , by providing tools of fundraising , volunteer management , communication , data management and outreach.

# Thanks!
